

PHAM THANH TUNG

Hanoi, Vietnam

PROFESSIONAL SUMMARY

- 5+ years in professional software development experience
- Strong skills in popular front-end libraries and frameworks such as Vue.js and ReactJS.
- Working experience with server-side JavaScript frameworks such as Node.js and Express.
- Experience with the entire software development life cycle, including requirements gathering, design, development, testing, and deployment.
- Experience with CI/CD pipeline and Docker
- Having experience in delivering complex cloud-based web/mobile applications.
- Highly technical with experience in front-end design and demonstrated ability to make tough technical decisions based on requirements, constraints, and trade-offs.
- Experience working on both small and large teams, as well as the ability to effectively collaborate with team members.

TECHNICAL EXPERTISE

Program languages	TypeScript, JavaScript
Frameworks & Libraries	NextJs, ReactJS, VueJS, Angular, NodeJS, NestJS, React Native, Apollo Client
IDE/Utilities	Visual Code, Vim
Containerization	Docker
SQL Databases	MS SQL Server, PostgreSQL
NoSQL Databases	MongoDB
Other Platforms & Tools	GitHub Actions, CloudFormation, CircleCI, GraphQL
Soft Skills	Good team player, Fluent in English communication, Excellence problem solving, analytical skills, Coaching, Work well under pressure

PROFESSIONAL EXPERIENCE

<p>Mar 2022 – Now</p>	<p>Project Description: Zuellig Pharma (Singapore) Develop a centralized authentication portal for multiple subdomains and build 2 subdomains to track orders and delivery statuses Position: Team leader Responsibility:</p> <ul style="list-style-type: none"> • Build code base, core features for projects using Nextjs • Lead Front-end architecture design and decisions related to project orientation and finding solutions to technical challenges. • Implement website optimization techniques to reduce website loading time, improve SEO, increase website score on Lighthouse. • Estimate plans and tasks for each feature, writing solution design documents for difficult features and guiding members to implement it. • Build commons libraries and reusable UI Components • Design backend api design and implement assigned features • Define coding standard, best practices for NextJs/TypeScript • Review code for other members, writing unit test and fix bugs • Configure CI/CD environments and fix bugs on production and ensuring smooth deployment of the projects • Contribute to sprint planning, estimation, and timely delivery of project milestones. Collaborate to meet project deadlines and maintain high-quality deliverables <p>Techniques:</p> <ul style="list-style-type: none"> • Next.js, Apollo Client , Tailwind, Story Book, React Testing Library • Docker, Helm Chart • PostgreSQL, GraphQL, Node.js
<p>Nov 2020– Feb 2022</p>	<p>Project Description: Cerebral (US) Build a platform connects clinician (doctor, therapist, care counselor) to patients so that they can setup appointment for treatment plan. Position: Team leader/Fullstack Developer Responsibility:</p> <ul style="list-style-type: none"> • Assist Project Manager in communication and coordinate meeting when needed • Configure the system infrastructures on AWS • Participate in discussions and decisions of architecture design and integration throughout the system • Develop and implement functionalities of the system including back-end and front-end. • Implement product onboarding flows and design ABTest solution using Kameleoon to run multiple experimented flows. • Build Marketing Website using Gasby and Prisma • Design SSO flow on Google and Okta and leading flow implementation, maintenance • Monitor logs on Datadog and fix bugs on productions. • Participate in on-call process helping customers to troubleshoot, identify and recover from p0-p1 issues • Developing and implementing processes for data privacy and security to ensure sensitive patient information is protected

	<ul style="list-style-type: none"> • Joining Mentorship Program to up-skill or re-skill for members on technical and non-technical skills <p>Techniques:</p> <ul style="list-style-type: none"> • React, Styled Component, Redux, Gasby, Micro Front-end • Node.js, NestJS, PostgreSQL, Prisma • Okta, Kameleoon, Datadog, Heap, Cypress, Google SSO, Iterable • AWS CloudFormation, S3, Cloud Formation, Apache Kafka, Event-driven patterns
Mar 2020 – Nov 2020	<p>Project Description: Your.rentals (Sweden) Migrate website from AngularJS to ReactJS Build mobile version of application with React Native Position: Software developer Responsibility:</p> <ul style="list-style-type: none"> • Estimate plans and suggest solution design for migration to ReactJS • Participate in building project structure and coding standards • Ensure application work well on production during the migration • Implement feature flags on Backend to control the migration process • Support other teams to deliver new features without conflicts • Deploy and monitor Production environment • Build React native code base and core features for mobile version • Assign tasks and review code for team members • Train team members on new technologies <p>Techniques:</p> <ul style="list-style-type: none"> • React, AngularJs, • React Native • Node.js, PostgreSQL
April 2019 – Feb 2020	<p>Project Description: Event Ticketing Platform Position: Team leader (Frontend) Responsibility:</p> <ul style="list-style-type: none"> • Collaborating with QA engineers to identify and resolve software defects and issues • Working with team on design and development of mobile app, landing page from concept through deployment • Build structure for the project. • Build base components and implement core features of the new system • Build user-friendly interfaces and ensure its responsiveness to work with all devices and resolutions • Improved SEO on page and optimize loading time on landing page faster than 2x times. • Develop event management features (live stream, chat, ticket sold) using SocketIO • Review code for other developers to ensure code quality

	<ul style="list-style-type: none"> • Estimate plans and break tasks for each feature. Assign tasks for other developers. • Responsible for setting up configs, environments and Docker file for Frontend Projects • Direct meeting with customers for sprint planning, demo new features, explain about solutions and suggest new features <p>Techniques:</p> <ul style="list-style-type: none"> • VueJS, Vuex, HTML5, CSS3 • SocketIO • MySQL
Oct 2018 – April 2019	<p>Project Description: Personal Finance Website Position: Software developer Responsibility:</p> <ul style="list-style-type: none"> • Build landing page using Nuxt • Develop and implement functionalities of the system including back-end and front-end. • Collaborate with the design team to ensure UI design specifications are followed and implemented. • Build and maintain transaction flow that enable user to be able to track and visualize cash flow, then analyze user's financial habits • Write clean and maintainable code using industry best practices and coding standards • Write unit tests and perform code reviews to ensure high-quality code and minimize errors • Participate in the development of complex web applications and UI components using React, Typescript, and other front-end technologies. • Debug and fix code issues in a timely and efficient manner to ensure web applications are stable and functional. <p>Techniques:</p> <ul style="list-style-type: none"> • Nuxt, Vue, Bootstrap, HTML5 • Node.js, Nestjs • Firebase

PROFESSIONAL SUMMARY

- **AWS Certified Solutions Architect – Associate** (AWS SA C03) Mar 2023.
- **Cloud DevOps Engineer** (Udacity) Sep 2023
- **AZURE AZ-900** (Microsoft) April 2022.
- **Professional Scrum Master I** (PSM I) Mar 2023.
- **TOEIC Certificate** (IIG) Oct 2022. Score: 945/990.
